Against Them All

Stick to Your Guns

I know you, because you're just like me Always questioning every single thing Never giving up without a fight Because for you, your resistance is a way of life

Young and angry, with every right to be Bent but not broken, hanging on by a thread Looked past by most, looked down on by all. We don't need them, it's forever us against them all Forever us against them all (4x)

GO!

A fire burns inside you, fueled by everything that You've ever been through Every battle you fight goes uphill But nothing can ever break your iron will

Young and angry, with every right to be Bent but not broken, hanging on by a thread Looked past by most, looked down on by all We don't need them, it's forever us against them all Forever us against them all (4x)

We don't need them
