

## Fire with Fire

### Stick to Your Guns

To stand on my two feet  
To lock these trembling knees  
This is what we need to not fall in the defeat  
They cant break me down  
And I am sick and tired of fighting fire with fire  
We've been misplaced we've been defaced but our heart will never be erased  
Fire with fire  
We've been misused we've been defused but this fight we will not lose  
And I will resist to ever make a fist  
Resistance marked as a weakness  
Ignorance masked as intelligence  
I stand in defiance  
Our violence has left us with a head made of stone and a heart just as cold  
A youth overdosing on animosity and loathing has made us close the gates and create a beast  
A being like no one has ever seen  
We have made ourselves mere men among giants  
May you stand with me in defiance  
May our only defense be letting down our defense  
Let defenseless left free of all our fences  
No longer will hostility guide us  
No longer will hate divide us  
No longer will violence undermine us  
Fire with Fire!
