

The Crown

Stick to Your Guns

Don't get me wrong
I'm grateful for the good intentions
You hung me on
Still there's a feeling like all the things we left undone
Became came the things we are running from
Don't get me wrong

We can't escape the voices in our heads that break us done
But heavy lies the crown
(And don't forget about me)
Maybe you need some time to walk it off and let it bleed
Just don't forget about me
(Don't forget about me)

Heavy lies the crown
Heavy lies the crown

You need to know
That I don't hold a things against you
That much is true
You did what you could
Sometimes we get the best of ourselves
Break it down so we can rebell
We can rebell

We can't escape the voices in our heads that break us down
But heavy lies the crown
(And don't forget about me)
Maybe you need some time to walk it off and let it bleed
Just don't forget about me

I understand the feeling of thinking you failed me
I understand the blaming and the pain that it brings
The pain that it brings
The pain that it brings
(Just let it go)

We can't escape the voices in our heads that break us done
Heavy lies the crown
(don't forget about me)
Maybe you need some time to walk it off and let it bleed
Just don't forget about me
(Just don't forget about me)

Heavy lies the crown
Heavy lies the crown
