

What Choice Did You Give Us?

Stick to Your Guns

What choice did you give us?
What choice did you give us?
What choice did you give us?
What choice?!

What choice did you give them?
Bound to machines
An attempt to prevent further suffering
Played by the rules
Repaid unjustly
But the truth is this:
We will not hesitate
Do not allow a peaceful rage to become hate
I promise you you'll regret the day
A stain that won't wash away

When it all falls down
While you're wondering
Where it all went
What it all meant
We'll have no words left
We may not be around
To see it fall into descent
We'll always be your enemy
So save your breath

What choice did you give us?
What choice?!

If they never change
We'll never fade (we'll never fade)
If they refuse
We'll light the fuse (we'll light the fucking fuse)

Look what we've done
We've created a fate
That we will never outrun
Time to change the path or be forced to forever live with what can never be undone

When it all falls down
While you're wondering
Where it all went
What it all meant
We'll have no words left
We may not be around
To see it fall into descent
We'll always be your enemy
So save your breath

What choice did you give us?
What choice did you give us?
What choice did you give us?
What choice?!

We will not hesitate
I promise you you'll regret the day

A stain that won't was away
