

Law and Order

Stiff Little Fingers

Everybody's down in the centre of town
Doing nothing wrong we're only hangin' around
They put you up against the wall
Make loud mouthed jokes just to make you feel small
Laugh at your appearance and the clothes you wear
Call that justice just isn't fair

R:
Talking bout their law and order
They don't do what they ought to
Law and order
There's no justice in it, None!

I had a friend who was lifted by the law
Lifted and shifted and dumped on the floor
They treated him like shit
Kicked him the head and then laughed when he bled
Spat in his face and pulled his hair
Call that justice just isn't fair

R:
I'm not trying to say we're always right
No-one's saying that it's black and white
All I'm saying is we don't agree
I don't think like you don't think like me
I hope you never do

And that's the way they try and run this land
How they hold you down and keep you in hand
You're just a pawn in their game
Just another number you aint got a name
Just a little punk y'know they don't care
Call that justice just isn't fair.

R:
