Sleepless Nights Alone

Still Remains

At the end of all the earth I find you here alone At the forefront of my heart And the butterflies That tried to bring you life Have died and gone away

Oh we are apart and I am lost So while she sleeps, she dreams We spend another sleepless night alone

You're so flirtatious with loneliness And time just lingers on We'll never become one Forget me, love I've tried to bring you home But I've died and gone away

Oh we are apart and I am lost So while she sleeps, she dreams We spend another sleepless night alone

Even if... Even if forever never comes You're the only... You're the only, only one Who makes me come undone

Oh we are apart and I am lost So while she sleeps, she dreams We spend another sleepless night alone

Oh we are apart and I am lost So while she sleeps, she dreams We spend another sleepless night alone
