

Thunder And Lightning

Sto zvířat

It's raining today
and I look through my window
the sky is so grey
and I watch how the wind blows
the raindrops away
smashing them to the ground
black clouds on the way
in the distance I hear the sound

And the thunder and lightning's
not so frightening anymore
it's not a bad thing
and it's passing by my door

When I was a kid
I thought that the roof would come
crushing in
it never did
but still I was wondering
the stories of old
they spoke about the heavenly creature
then I was told
it's just a force of nature

So don't be afraid
of the sound when the thunder rolls
you don't have to pray
it's not supernatural
the light from the clouds
it's not your enemy
what it's about
just simple electricity
