Never Come Back

Stolen Babies

Is this a mirror, water, or distant mirage?

In the tight room, such a slick maw No on can keep up, spinning it too far But does it feel good? Like the sweetest air To run with fibs, and make them care

And it's a big room, flooded with starry eyes And I couldn't leave with a smile If I could never come back

With your lights, leave us alone It's blinding, leave us alone

It's outline like a mountain, carved out like a thug It's a mouth, a storm, a show, a trap!

Calling out to the falling rocks We can make them stop before they get to us Sorry if no one comes around, They've gone fishing in a mound of forged evidence (I thought I told you to never come around here I told you to never come back)

With your lights, leave us alone It's blinding, leave us alone

It's a mouth, a storm, a show, but nothing but a trap "What? You're still here? Go away."

With your lights, leave us alone It's blinding, leave us alone

Is this a mirror, water, or distant mirage? I thought I told you to never come, Never come back
