Ride On

The Stone Roses

Way down deep dark and funky Tie me tightly to your bed Ride on, lady, I'm your monkey Yes, the organ grinder's getting wet Oh you're still filthy dragged on the sand of another mans land Another man riding on another man's dream If I call on our beautiful I may issue I don't want to miss you I don't want to diss you I don't want to miss you But you're on my list, you I put you on my list, you Way down deep dark and funky Tie me tightly to your bed Ride on, lady, I'm your monkey Yes, the organ grinder's getting wet You're still filthy dragged on the sand of another mans land Another man riding on another man's dream Singing for doorways and begging for light My lock hears the strike It's alright It's just I caught you playing with the light I may issue I don't want to miss you Not going to miss you I don't want to miss you I put you on my list, you I put you on my list, you If I call on our beautiful I may issue I don't want to miss you I come here to bliss you I don't want to miss you I put you on my list, you I put you on my list, you (this is the b-side to ten storey love song)
