Say You'll Haunt Me

Stone Sour

Little supernovas in my head Little soft pulses in my dead Little souvenirs and secrets shared Little off guard and unprepared

I was never good enough to find I was never bad enough to mind In the middle I will do my best Take me in your arms and leave the rest

I will give you anything to

Say you want to stay, you want me to Say you'll never die, you'll always haunt me I want to know I belong to you Say you'll haunt me

Together, together we'll be together, together forever

Little variations on my page Little doors open on my cage Little time has come and gone so far Little by little who you are

I can see the patterns on your face I can see the miracles I trace Symmetry in shadows I can't hide I just want to be right by your side

I will give you everything to

Say you want to stay you want me too Say you'll never die, you'll always haunt me I want to know I belong to you Say you'll haunt me 2x

Together, together we'll be together, together forever I belong to you Together, together we'll be together, together forever I belong to you

Little supernovas in my head Little soft pulses in my dead Little souvenirs and secrets shared Little off guard and unprepared

I will give you anything to I will give you everything to

Say you want to stay you want me too Say you'll never die you'll always haunt me I want to know I belong to you Say you'll haunt me 2x

Together, together we'll be together, together forever

```
I belong to you
Together, together we'll be together, together forever
I belong to you
```
