They creep in on you even as you dream

Making you believe its exactly what it seems

They're gonna get you someday

And there's no running away

They're deep beneath your skin where they've always been

No one is safe - No one is safe

Falling in your sleep, don't wake up, just hit the ground It's real but you don't realize, you're dead you only act alive

Their right here looking through your eyes
And it's not you it's them in your disguise
And they become you today
And now you can't break away
You were such an easy prey
You just hand your life away

No one is safe -No one is safe

Falling in your sleep, don't wake up, just hit the ground It's real but you don't realize, you're dead you only act alive Running in your dreams, don't wake up, you will be found It's real but you don't realize, you have to live to be alive

Wake me (Wake me up)

It's time to stand up & fight for life

It's time to stand up its time to wake up

It's real but you don't realize

Falling in your sleep, don't wake up, just hit the ground It's real but you don't realize, you're dead you only act alive Running in your dreams, don't wake up, you will be found It's real but you don't realize, you have to live to be alive

Falling in your dreams wake up
Wake up this is real
You have to live to be alive - Be alive
