

# Never Surrender

## Straight Line Stitch

Out from the darkness and into the light  
I open up my eyes awoken by the sight  
Of the walls that are closing in, it's happening again  
Just another black cloud that's become my only friend

Bring it on  
No one said it'd be easy and you don't have to believe me  
When I tell you it's not over  
I've come too far to back down now  
Gotta finish what I started it's not over (no it's not over)

So hold on say we'll never surrender  
If there's a chance of losing hope let it go  
So hold on say we'll never surrender  
If there's a chance of losing hope let it go

Another sleepless night alone and I can't do this on my own  
I'm reaching out to touch someone just like me  
But no one seems to hear my voice it echoes across the void  
Shattering the noise

Bring it on  
This is our chance for redemption and you don't have to question  
Whether we're or if we're right  
I've come too far to back down now  
Gotta finish what I started it's not over (no it's not over)

So hold on say you'll never surrender  
If there's a chance of losing hope let it go  
So hold on say we'll never surrender  
If there's a chance of losing hope let it go

So hold on  
This is the fight of our lives  
Hold on  
Whether we're wrong or we're right  
Hold on

So hold on say we'll never surrender  
If there's a chance of losing hope let it go  
So hold on say we'll never surrender  
If there's a chance of losing hope let it go  
So hold on
