

Living In The Danger Zone

Strangeways

I don't think they'll hear us
'Til the whole worlds burnin' down
Is there anybody out there
That gives a damn about love

Can't you see the thunder clouds
I'm waiting for the lightning strike
Can't you hear the falling rain
As it cuts through the night

Living in the danger zone
It's not their life, it's yours and mine
Living in the danger zone
And we're running out of time, no

We don't need no heroes
We don't need no guns
Is there anybody out there
That knows what's going on

I can feel the burning wind
Just waiting for the lightning strike
I can hear the engines roar
Will they see the light

Living in the danger zone
It's not their life, it's yours and mine
Living in the danger zone
And we're running out of time
Running out of time

Living in the danger zone

Living in the danger zone
It's not their life, it's yours and mine
Living in the danger zone
And we're running out of time
Living in the danger zone
It's not their life, it's yours and mine
Living in the danger zone
And we're running out of time
Running out of time

And we're running out of time
Running out of time
