

Silver into Blue

The Stranglers

Set sail on a mirror
Nothing stirs for here it's so easy to be
Just to be
Slipped into a big sky
Not a cloud to be seen
It was a perfect day
Such a perfect day

How can you feel hurt
Now can you see it
See the stars
With your eyes
That was me

See them shine shining just for you
Silver into blue

See a sun
Kiss a sky
Shout the moon

Send the tide turning just for you
Silver into blue

Two feet on the starship
Nothing gets in our way
We're going up and away
Up out of the way (milky)

No time for the red shift
We'll push in front of the sun
And start the world again
And share a brand new day
