

## Sinister

### The Strangers

Just like sinister she's going where the winds blow  
Just like sinister she's going where the weak field glows  
That's right heavenly blue she'll sing songs of sad day to come

Just like sinister she'll go where the heartbeat  
So sinister moving with streamline grace  
That's right heavenly blue she'll paint empty beaches black skies

She got you fried to the back teeth  
Head hanging down  
She got a needle in your eye boy  
See all the blood running now

You're rolling on empty tracks  
Not going to rest in peace  
Won't let you fall through the cracks  
Get off the ghost train

And you give all your love to her  
Then she throws you away

Just like sinister she's going where the wind blows  
So sinister she'll keep you warm keep you cold  
Get your money well spent  
Like heavenly blue she'll paint empty beaches black skies

I don't care what she says or where she's been  
Such a sad decoy
