

## The Raven

## The Stranglers

Fly straight with perfection  
Find me a new direction  
You never realised the things they said  
We'll never realise until we're dead

The ebony embittered souls of children  
We'll seek another way before too long  
But will you stop my wind before I'm gone

And when you find me all alone  
Your world has never been my own

And when you find me  
And when you find me all alone  
Your world has never been my own

My friend you're black and when you fly you're wild  
I am white sometimes I behave just like a child  
The northern seas are cold but they're our own  
We'll sail your southern seas before too long

When I was a viking  
My friend he was the raven
