

## Never There

Strata

I am on the brink of losing everything  
Hanging on the edge of every word she says  
And you were never there  
You were never there

She stabs deep into me  
Am I too blind to see what this has done to me  
She stabs deep into me  
Am I too numb to feel this anymore

You were the one who could save me  
You were the one who abandoned me

I am patiently waiting here to see  
Which of us survives  
When all of this collides with reality

She stabs deep into me  
Am I too blind to see what this has done to me  
She stabs deep into me  
Am I too numb to feel this anymore

You were never there.
