## Soul of a Vagabond

## **Stratovarius**

Pack on my back I wander Over mountains across the seas My yearning soul keeps roaming In the endless search for peace

Sky is my roof, my shelter Stars shine and light my way Earth is my bed, my altar On this road that leads to nowhere

In silence I scream but no one listens to me Absolution, salvation, my sins won't leave me be The first cry, the last breath We are born to die This madness never ending Don't know the reason why

Soul of a vagabond Illusion, delusion, we are born to live Temptation, damnation, starvation, deformation

The road goes on forever
It's an old and trustworthy friend
I have tasted it's dust and treasures
But my twisted mind won't mend

My burden is heavy to carry
My destiny lies ahead
My spirit is always leaving
For this road that leads to nowhere

In silence I scream but no one listens to me Absolution, salvation, my sins won't leave me be The first cry, the last breath We are born to die This madness never ending Don't know the reason why

Soul of a vagabond Illusion, delusion, we are born to live Temptation, damnation, starvation, deformation

In silence I scream but no one listens to me Absolution, salvation, my sins won't leave me be The first cry, the last breath We are born to die This madness never ending Don't know the reason why

Illusion, delusion, we are born to live Temptation, damnation, starvation, deformation

In silence I scream but no one listens to me Absolution, salvation, my sins won't leave me be The first cry, the last breath
