

## We Hold the Key

Stratovarius

I'm watching as the morning sun rises  
Before my very eyes  
Revealing all this beauty  
Questions fill my mind once again  
Clearing my thoughts have I been blind  
Now I see

The hole is getting bigger in the sky  
Do you know the reason why nobody seems to care  
Everything is so well in your life  
Did you ever give a dime  
To things that you really believed  
The future will show  
What happens to our world

We hold the key to the door  
Of salvation eternally  
We hold the key to minds  
To the future of mankind

It's time to wake up from you dreams  
To reality this can't go on believe me  
If you just turn your head away  
Will tomorrow be the same  
Try to foresee  
The future will show  
What happens to our world

We hold the key to the door  
Of salvation eternally  
We hold the key to minds  
To the future of mankind

What will we find  
Mountains to climb  
More destruction  
And hatred we'll discover  
Suddenly sounds awake me  
Birds singing beautifully  
Maybe there is hope still left  
In this world
