## Night of My Life

## **Barbra Streisand**

Closer Sight and the sound Roller coaster That merry-go-round We can't wait for that show to start That fire, that feeling, your heartbeat We have what others can't tear apart Taking over I fight to the end for the night of my life And nothing can get in my way And love is a river And river is ocean Take of your pleasure And all that you cry for I go to the wall for the night of my life I play every game that you play I shout out my struggles and Send out a message to you No early warning I'm under the radar You're closer Sight and the sound Roller coaster And baby no one would go that far To close all those doors behind us And to the top of the world we climb Taking over I fight to the end for the night of my life And nothing will get in my way I shout out my struggles and... Send out a message to you No early warning I'm under the radar Calling love (Calling love) Take me to the love (Calling love) Take me to the morning (Calling love) I fight to the end for the night of my life And nothing can stand in my way And love has a color And colors are many Blue is for lonely And red is for danger I go for the wall for the night of my life I play every game that you play I shout out my struggles and... Send out a message to you No early warning I'm under the radar Calling love (Calling love) Take me to the love (Calling love) Ain't no early warning (Calling love) Tell me what I do for you (Calling love) Calling love (Calling love) Get me to the love (Calling love) Tell me that you want it (Calling Love) Tell me that you want it You're closer
