

Where's That Rainbow

Barbra Streisand

Troubles really are bubbles they say
And I'm bubbling over today
Spring brings roses to people you see
But it brings hayfever to me
My luck will vary surely
That's purely a curse
My luck has changed
Yes, it gotten
From rotten
To worse

Where's that rainbow they sing about
Where's that lining they cheer about
Where's that lovenest where love is
king ever after

Where's that blue room they sing about
Where's that sunshine they fling about
I know morning will come but
pardon my laughter

In each scenario you can depend
on the end where the lovers agree
Where's that Lothario where does he roam
with his dome vaselined as can be

It is easy to see alright
Everything's gonna be alright
Be just dandy for everybody but me

In each scenario you can depend
On the end where the lovers agree
Where's that Lothario where does he roam
With his dome vaselined as can be

It is easy to see alright
Everything's gonna be alright
Be just dandy for everybody but me

Oh yeah, I see that rainbow
For everybody
But me
