

## Holding On

Stryper

Everyone has been hurt before - love will come and go  
When you put your faith in something so unsure  
Never happy and wanting more - love will never grow  
Till you put your faith in something that's secure

I'm holding on to the One from above  
The One that's secure the one that has cured  
My broken heart with perfect love

I never thought it would be this good  
I never even dreamed that someone could make my  
Life so complete  
So if you're hurting and wanting more  
No matter how it seems you can have it all  
If you will just believe

That someone is there for you  
To catch you when you fall  
To make your life brand new  
To give you all

I'm holding on to the One from above  
The One that's secure the one that has cured  
My broken heart with perfect love
