## Alive

**Sturm und Drang** 

Right out the night, we're taking the fight From now on we'll go our way Glory we'll find, leave sadness behind For reborn we are today You're gonna see that it's over, we'll never give it up refrain: We come alive Never falter, never fail We come alive Turn and run now when we come alive Right out the black, we'll win your attack And freedom shall be eternal Forever again our power will win And yours lies won't be heard of You're gonna see that it's over, we'll never give it up We come alive Never falter, never fail We come alive Run away and turn your tail refrain We come alive You're gonna see that it's over, we'll never give it up
