

Mission To Mars

Styx

Now I can say in less than a day we'll be underway on our mission to Mars
Theoretical themes, radical schemes, chasing our dreams on our mission to Mars
Tomorrow we'll say that this is the day we'll be on our way on the mission to Mars

Say goodbye to all your friends
Now a whole new life begins
As the universe's mysteries unfold
And the audience back home is holding on
With bated breath
To hear the stories that are waiting to be told

Now I can say in less than a day we'll be underway on our mission to Mars
Theoretical themes, radical schemes, chasing our dreams on our mission to Mars
Astrophysical plans, political sands, it's all in our hands on our mission to Mars
Sparks and quarks, they glow in the dark
They'll someday remark as a walk in the park, this mission to Mars

Now I can say this is the day we'll be on our way on the mission to Mars
Now I can say that this is the day we'll be on our way on the mission to Mars
