

# One With Everything

Styx

Hold on tightly to your innocence  
And don't you let go  
Until you know it's gonna be your way

Through the tangle and the bramble  
There's a thread that runs through  
And it's true  
There's no need to be afraid

Smiling ear to ear  
It's something in the atmosphere  
Every star above reflecting in your sea of love  
Is it just a dream  
Or are things as they really seem  
Somebody help me make the call

You could be the light  
That shines so bright  
You show the way to go  
And if it's so  
Don't be too surprised

Just give yourself a chance  
And take a glance  
Around to see the glow  
Burning in my eyes

Smiling ear to ear  
It's something in the atmosphere  
Every star above reflecting in your sea of love  
This is not a dream  
It's just the way it's always been  
You've got to rise above it all

Somewhere down the road that we follow  
We'll be one with everything  
I know as soon as tomorrow  
We could be arriving

Somewhere down the road that we follow  
We'll be one with everything  
I know as soon as tomorrow  
We could be arriving  
And in my dreams I'm there by your side  
Learning to fly again

The world we see (World we see and hear)  
Is a mystery (Mystery but we)  
But we hold the key (Hold the key to the door)  
If we have the faith to live (Have the faith anymore)  
And believe

Somewhere down the road that we follow  
We'll be one with everything  
I know as soon as tomorrow  
We could be arriving  
And in my dreams I'm there by your side

Learning to fly again
