

The Outpost

Styx

We finally made our way out the storm
With only minutes left to spare
Well there's a new home waiting on the outpost

Touch down onto the surface that we found
Hope for the planet that just may
Keep us moving

When the stars are falling
We can hear them calling
And we won't stop searching
Into the night we ride

It's the last stop
We say goodbye to all we know
Same fate that helped us get this far
Now there's a new hope far beyond this outpost

Touch down onto the surface that we found
Hope for the planet that just may
Keep us moving

When the stars are falling
We can hear them calling
And we won't stop searching
Into the night we ride

Along the way
Along the way
Who knows what we'll discover

The price we pay
The price we pay
For our sisters and brothers

We lost our way
We lost our way
Oh the hell that we've uncovered

Along the way
We lost our way
We lost our way

Touch down onto the surface that we found
Hope for the planet that just may
Keep us moving

When the stars are falling
We can hear them calling
And we won't stop searching
Into the night we ride

And we won't stop searching
Into the night we ride
