

Special Place

Sub Focus

Most of us have a special place we like to visit
Because we actually feel good being there.
What we hear in that place has a lot to do with it.

Here, boy... come here, boy.

If the sounds are soothing,
Our pulse rate drops,
Our muscles relax,
We feel at peace.

All too often though, when we stop to listen to great music
We settle for sound that is only average.

What great music deserves
Is full deep bass
To give it warmth.

Come.

Special place...
