

Murdera

Sublime with Rome

She's a murderera
Oh yes I said, oh
She's a murderera
Oh yes, and oh yes, and I said now.
Nananana
She's a murderera
Oh yes I said, oh
She's a murderera
But she won't play me for no clown
Nananana
She's mine

She wanna ride me all around
Like a bicycle, eat up my fun and make me frown
But I'm gonna take her down
Got me on the ground
She said she hates my actions
But she loves the way I sound

I wanna rub up on her friend
But got too drunk to start [?]
And fell down to the end

Now she won't let me in
Fussin and fightin'
Darlin', darlin'
I'm doing you right

She's a murderera
Oh yes I said, oh
She's a murderera
Oh yes, and oh yes, and I said now.
Nananana
She's a murderera
Oh yes I said, oh
She's a murderera
But she won't play me for no clown
Nananana
She's mine

I was born to strike a nerve
With melodies and lyrics
It's the only thing I serve,
And it's all I need
Smokin' on the best - purp
As [?] moves in from my head into my chest
Hey, and if I get kicked out this time
Will you rock the boat to spin that
You'da make it sound so fine
Ladies always say, my my my my my

She's a murderera
Oh yes I said, oh
She's a murderera
Oh yes, and oh yes, and I said now.
Nananana
She's a murderera

Oh yes I said, oh
She's a murderera
But she won't play me for no clown
Nananana
She's mine...

I won't be jeopardized no more
I won't even try no more
I just won't sympathize no more
Yeah
You just wanna use me
Steal lovin' and abuse me, oh
How quickly I was to forget that
Forever, you said, don't mean a thing
No...

She's a murderera
Oh yes I said, oh
She's a murderera
Oh yes, and oh yes, and I said now.
Nananana
She's a murderera
Oh yes I said, oh
She's a murderera
But she won't play me for no clown
Nananana

She's mine, she's mine
And she won't hurt me again
She's a murderera, she's a murderera
And she won't hurt me no more
She's mine, she's mine
But she won't hurt me again
She's a murderera, she's a murderera
But she won't hurt me again
She's a murderera, a filthy murderera
But she won't hurt me again.
