

A strange relationship has started  
A strange relationship indeed  
It's like a watercolor forming  
Between the pages of a dream

And it's calling you  
It's calling me  
It's calling everyone to be

In a future world with an astrogirl  
One on one is all you need  
In a future world with an astrogirl  
One on one is all you need

A strange experience has started  
Between her molecules and me  
It's like two seas between us forming  
From obsolete technology

And it's calling you  
It's calling me  
It's calling everyone to be

In a future world with an astrogirl  
One on one is all you need  
In a future world with an astrogirl  
The sky goes on and on for you and me

The sky goes on and on for you and me  
The sky goes on and on for you and me

In a future world with an astrogirl  
There'll be no obstacles, you'll see  
'Cos we'll be making friends with the supermen  
The sky goes on and on for you and me

The sky goes on and on for you and me  
The sky goes on and on for you  
The sky goes on and on
