

The air is still we are struck like matches
Too beautiful to really care what's right
The rumours burn like roman candles
In the broken lights

This love is lifting
The blood is lifting you
Over snowblind barriers
This love is lifting who
This blood is lifting you
I was snowblind for a moment too

There's aniseed and you're laced with kisses
The morning comes with the blackbird song
We find our keys on the kitchen table
And forget what's done

This love is lifting
The blood is lifting you
Over snowblind barriers
This blood is lifting who
This burden's is lifting you
I was snowblind for a moment too

You were frozen by the moment
Thing is what can we do
When I'm frozen by the moment too
All the statues and the x can't
Hold a candle to you
When you're frozen by the moment too

This blood is lifting
This burden's lifting you
All these snowblind moment
This blood is lifting
This burden's lifting you
I was snowblind for a moment too
