

Get Yourself Together

Sugar Jones

You need to get yourself together
'Cause right now boy you're playin' with our love
You be busy trippin' on me
You know you got me feelin' like I'm needin' to leave

You need to get yourself together
'Cause right now boy you're playin' with our love
You be busy trippin' on me
You know you got me feelin' like I'm needin' to leave

No matter who I be with or what I do
I look around and I always be seein' you
In the cut with your boys spyin' on me
Tryin' to check up on a sister back up off me
You need to stop before you end up losin' me
You say it's love but it seems like abuse to me
How can we ever grow when trust is something you never show

Everytime you page
If I'm not at home I'm spending dollars
callin' back from my cell phone
And even though a lotta guys be jackin'
I step to you tryin' to see what's crackin'
Let's go out tonight do what you like
Don't wanna fuss no more don't wanna right
You question if I'm faithful
Pushin' me somewhere I don't wanna go

What can I do
If you don't trust me
I can't continue
To let you hurt me

You know that you really need to get yourself together
Could it be you and me ain't ready for the stormy weather
You've been so busy trippin' on me that you can't even see
