Back to California

How long I'll wait Just to say goodbye Ten different ways to enjoy this night Can't do this anymore Won't feel you anymore

How long I'll wait Just to say goodbye You could never let me in Holding on until the end

The time I waste just to say goodbye Out of your way I could do this right Can't see you anymore Won't feel you anymore

How long I'll stay Just to say goodbye, say goodbye

Leave it all the fights and all Summer's getting colder Drive all night to hold you tight Back to California Days went by We waited and I guess we're getting older We couldn't win in the end

You're gone I'm miles away Turning out your lights Ten different ways I could end this night Can't do this anymore Won't feel you anymore

How long I'll wait Just to say goodbye, say goodbye

Leave it all the fights and all Summer's getting colder Drive all night to hold you tight Back to California Days went by We waited and I guess we're getting older We couldn't win in the end

You're gone

Sugarcult
