

Champagne

Sugarcult

All I can taste is champagne
When it hits the brain like cocaine
Spinning around and round
I can't get up without your help
I've fallen down

All I can taste is champagne
Another day down the drain
Sleeping around and around
We can't make up without your help
It's over now

You want it
You need it
You can't explain
You fight it
You feed it
You can and I can live without you,
Ohh, moving on without you, ohh

Love is like Novocaine
And it leaves a little stain
The beauty in all this pain is I can't get away from you
So pull me down and don't make a sound

You want it
You need it
You can't explain
You fight it
You feed it
You can and I can live without you,
Ohh, moving on without you, ohh

All I can taste is champagne
Dancing away down my veins
Spinning around and round
I can't get up without your help
I'm on the ground

Somebody help me
I'm losing everything when I'm without you,
Ohh, doing it without you, ohh

All I can taste is champagne
Another day down the drain
All I can taste is champagne
