

Destination Anywhere

Sugarcult

Somebody help me get out of this place
Too many words that confuse what I say
Calling in the victims of probable cause
Give me the keys to get out of this box

Keep both hands up
On the wheel to destination anywhere
Keep both hands up
On the wheel to take control

I can't let myself fall down
I can't help myself right now
I can't let myself fall down
If I can't be myself, I fall down

Somebody help me get out of this place
Too many fools with a smile and a face
Somebody help, The prescription is wrong
Never awake unless I'm faking

I can't let myself fall down
I can't help myself right now
I can't let myself fall down
If I can't be myself right now

Keep your head on straight
Make the kids behave
Keep your mind awake
If I can't be myself, I fall down

Keep both hands up on the wheel up
Destination anywhere

I can't let myself fall down
I can't help myself right now
I can't let myself fall down
If I can't be myself right now

Keep your head on straight
Make the kids behave
Keep your mind awake
If I can't be myself, I fall down

Fall down
