

City of Silver Dreams

Sugarland

The window in New York City
All dressed up with ribbons and smiles
Snow covers the park like a carpet
Bells on white carriages roll by in style

St. Patrick's Cathedral is all lit up
When the doors open wide, I can see
All of those candles burning inside
Looks like somebody's birthday party to me

Snowy night, catch the light
Shimmer bright, angels sing
Here below, children know
Faces glow, bells they ring
Through a city of silver dreams

They hung a star over 5th Avenue
Like a beacon that's calling you home
With our gifts we come looking for comfort
May we find in each other, we're not so alone

Snowy night, catch the light
Shimmer bright, angels sing
Here below, children know
Faces glow, bells they ring
Through a city of silver dreams

It's like this whole town has swallowed some magic
With a taxi horns singing away
They say that this city will change you
But it ain't me that's been changing
From what I can tell

Snowy night, catch the light
Shimmer bright, angels sing
Here below, children know
Faces glow, bells they ring
Through a city, through a city so pretty
In this city of silver dreams
