It's written on our palms and it's written on our hearts It's written in our songs and it's written in the stars Sometimes all we can do is stand up tall They're standing in line just to watch us fall

Whoooa, whoooa, whoooa
We can't forget these are the days
whoooa, whoooa, don't be afraid
We can't forget these are the days

Well, we got each other and that's all we need From here on out it's just you and me Two hometown hearts up against the world That don't stand a chance against this boy and girl

We've faced em down, fought bigger fights And I know, babe, we're gonna be alright

Whoooa, whoooa, whoooa We can't forget these are the days whoooa, whoooa, don't be afraid We can't forget these are the days

Well, it feels like we're living from paycheck to check we wake up wondering what might happen next Yeah, sometimes it feels like we won't make it through But the hard times pass like the good ones do Baby, wrap your fingers and hold on tight I'll be right here beside you tonight

Baby, climb up here, watch the city glow Let's make a wish on the fireworks below We're making moments we won't forget We fill in ones that haven't happened yet

Whooa, whooa, whooa, whooa We can't forget these are the days whoooa, whoooa, don't be afraid We can't forget these are the days

whoooa, whoooa, don't be afraid We can't forget these are the days
