

Left, Right, Black, White

Sugarplum Fairy

Standing in the shade of your love
I gotta pick myself up
Gotta find my way back there
Dirty roads I'll make it through clean
'cause I know what you mean
Gotta get it on downtown

I got sound I will clutch on your generation
I will shout out loud every heart will stop
I got love, got hate, left, right, black, white temptations
And you'll see it all around

Right side shake it over to your left side
We can love it all by nightfall
If you're in a dream you better believe it
Black, white there can never be an outside
Leave it all behind at midnight
If you're in a dream you better believe it

Left, right, black, white
Left, right, black, white

Running down the alleys of town
Can I see or am I blind
Will I ever figure out
Falling from the edge, am I down?
Whay can't I catch a sound
Of myself falling down?

I got sound I will clutch on your generation
I will shout out loud every heart will stop
I got love, got hate, left, right, black, white temptations
And you'll see it all around

Right side shake it over to your left side
We can love it all by nightfall
If you're in a dream you better believe it
Black, white there can never be an outside
Leave it all behind at midnight
If you're in a dream you better believe it

Right side shake it over to your left side
We can love it all by nightfall
If you're in a dream you better believe it
Black, white there can never be an outside
Leave it all behind at midnight
If you're in a dream you better believe it

Left, right shake it over to your black, white
We can love it all by nightfall
If you're in a dream you better believe it
Left, right
