

Come Alive

Suicidal Tendencies

Something, there's something
There's something, there's something
Oh there's something inside
There's no words that can explain

Something inside me leaves a mesmerizing pain
Something inside me, oh it makes me swell
Something inside me makes my life a living hell
Something inside me, day by day it gets worse
Something inside me, I'm a prisoner of a curse
Something inside me, oh don't you believe?
Something inside me, oh I pray it'll leave

There's something inside me
Oh my God it's got control
Something inside me eats away my mind and soul
Something inside me is terrorizing me
Something inside me, now I set that mother free
Something's going on in me
Come out, come out wherever you are

Something, something, something, something
Something, there's something inside me
There's something inside me
There's something inside me
There's something inside me

Something, there's something
There's something, there's something
Something, there's something inside me
Something, there's something inside me
Something, there's something inside me
Something

You wanna play with my little friend?

Something, there's something
There's something, there's something
