

# Fuck Everything

## Suicide Silence

If you hate the world around you  
And you hate everything that you see  
And if what you see makes you happy  
Then fuck off 'cause we're all out of time  
So follow me

Life is short, I'll make it what's worth  
With time well spent, time spent so well  
So don't run away, just face the new day  
Without a single fear in mind  
Just take it one day at a time

And fuck everything, everything  
Fuck everything, everything!  
If you hate the world  
And it makes you sick what you see  
Then follow me

Life is short, I'll make it what's worth  
With time well spent, time spent so well  
So don't run away, just face the new day  
Without a single fear in mind  
Just take it one day at a time

And fuck everything, everything  
Fuck everything, everything!  
Welcome to a nightmare  
This is the place we all call home  
Welcome to a nightmare  
This is the place we hate to call home  
We fucking hate  
Hate  
Hate  
Hate

If you hate the world and you hate what you see  
Then say this with me; fuck everything (6x)

Put your fingers in the fucking air  
And live your life without a care

If you hate the world and you hate what you see  
Then say this with me; fuck everything (2x)

If you hate the world (fuck everything)  
And it makes you sick what you see

Fuck everything  
Say this with me

Fuck everything (22x)
