

Dead Leaves

Sunshine

Dead leaves bleeding on the carpet
Sirens play me like a card
You wanna take it, take control
You wanna take it, i won't take it
Sing along and divide

Is that me the wolf in the mirror?
My body is a cage
You wanna take it, take control
You wanna take it away

How does it feel when you get up above light blue sky
How does it feel when you get down below where dreams go by
How does it feel, tell me before I die

I know you did it, coz you told me
To kill a beat is vanity
The crystal floor will take control
You wanna take it, I want take it
Sing along and divide

How does it feel when you get up above light blue sky
How does it feel when you get down below where dreams go by
How does it feel when you get crimson butterfly
Can reach the sky
How does it feel, tell me before I die
