

Moon Rats

Sunshine

She got it, she got it, she got it what she wanted
she got it, she got it - she takes me home
she got it, she got it, she got it what she wanted
she got it, she got it - she's monochrome
This is warning, black flag flying
This is crash down, last night call
I'm the bad boy you always wanted
I don't know you, not at all
She got it, she got it, she got it what she wanted
she got it, she got it - she slips inside
she got it, she got it, she got it what she wanted
she got it, she got it - rollercoaster ride

Another town, another party
everybody need a little place to hide
we are moon rats no disaster
we all need a little place to hide
This is always wanted lying stripped down on the floor
we're moon rats, no disaster, we're moon rats seeking more

she got it, she got it, she got it what she wanted
she got it, she got it - she takes me home
she got it, she got it, she got it what she wanted
she got it, she got it - she's monochrome

We are moon rats, try to swallow
dirty hands and dirty knees
we've been here for far too long now
smell the trouble, stop and freeze
she got it, she got it, she got it what she wanted
she got it, she got it - she's slip and slide
she got it, she got it, she got it what she wanted
she got it, she got it - rollercoaster ride

Another town, another party
everybody need a little place to hide
we are moon rats no disaster
consuming night when daylight died
This is what we always wanted lying stripper down on the floor
we're moon rats no disaster, we're moon rats seeking more

Another town...

she got it, she got it, she got it what she wanted
she got it, she got it - she's got a knife
she got it, she got it, she got it what she wanted
she got it, she got it - she took my life
