The Spirit Inside

One chance One day It won't come around I've been waiting For a sign of life So many promises I can't let them go There's still So much to say And i just need to know If all you had was One chance To turn this around Would you have The spirit inside If all you had was One chance To take what you need From life Would you have The spirit inside Lonely memories They burn in the night I'll keep you close to me 'til the pain runs dry If all you had was One chance To turn this around Would you have The spirit inside If all you had was One chance

To take what you need From life Would you have The spirit inside

One chance To turn this around Would you have The spirit inside If all you had was One chance To take what you need From life Would you have The spirit inside Sunstorm
