

# Lighting The Way

Superdrag

I've been lighting the way  
With bridges burning low now  
I've been wasting the days  
Like living's going out of style now

I've been up every night  
Walking down the highway  
If I can make things right  
I'm gonna do it my way

Send it straight to you  
Like you put a price on everything you do  
Like a song that ain't worth singing

I've been hiding away  
Waiting for disaster  
I regret the delay  
I wish I could've healed up faster

I've been up every night  
Walking down the highway  
If I can make things right  
I'm gonna do it my way

Send it straight to you  
Like you put a price on everything you do  
Like a song that ain't worth singing  
A thought that ain't worth thinking  
I've gotta find something worth bringing back to you

Send it straight to you  
Like you put a price on everything you do  
Like a song that ain't worth singing  
A thought that ain't worth thinking  
I've gotta find something worth bringing back to you  
To you

If I can make things right  
I'm gonna do it my way  
If I can make things right  
I'm gonna do it my way

If I can make things right  
If I can make things right  
If I can make things right  
If I can make things right

If I can make things right  
If I can make things right  
If I can make things right
