## Supertramp

Well the road I see before me
Threatens pain at every bend, yeah
Well my needs are mine, I understand
And hope to calling friends
Well, good company, it may comfort me
But I don't want love to distract my heart from the way

Now your love it gave me sorrow

And a broken heart to mend, yeah

So I took me to this lonely road

My sweet hopes, to defend

Oh and why pretend, I won't look back

Even though the love of a happy man waits before

Well, the winter wind blows chilly And the road is dark and gray So take pity on a wanderer should you pass me on the way

Oh, I'm left alone without a home Makes a man ask why he travels on When hope is gone

It's a long road
It's a long road
It's a long road
It's a long road
