

Let's Just Sing

Support Lesbiens

I'm slightly white feeling the darkness behind me
I'm slightly black tasting the hatred around me
The candle's red and when it burns it goes yellow
So why envy and even being so jealous

Come on and let's just sing tudututudututu blues
And groove is from the black printing foot
The truth and shoes is what they already knew

I'm talking about the love and the lonely ones
Truth and shoes won't feed anyone

We'd better feel instead of seeing and killing
We'd better feel instead of seeing and killing

I'm talking about the love and the lonely ones
Truth and shoes won't feed anyone

Just sing tudututudututu
Do you know, don't you know all of this sucks
So do you know, don't you know we will never grow
Do you know, don't you know drop the little gun
So I will know that you know
Still we'll never grow

We'd better feel instead of seeing and killing
We'd better feel instead of seeing and killing

I'm talking about the love and the lonely ones
Truth and shoes won't feed anyone
Just sing tudututudututu
