

Excuse me professor, I'm gonna try if you left me to believe
I got this feeling I'm gonna die if you don't let me to leave
'Cause it's been quite a time until it's now
And still you don't let me to breath
And all that has stayed is just a smile
And all that has stayed is just a smile
And still you don't let me to breath

Nail me and bleed me just to get something in me
They are talking about the nation, talking about the crime
All you need surroundsyou dear
We're talking about the people, talking about the fools
If we're talking about our minds, we're talking about the rules
All you want and all you need is to be someones brother

Get along, get along and all that you know won't be wrong
I'm talking about the truth but the truth is to loose
If I'll be true you say I'll be you
But you are not my friend not even brother -
not even sister and both would say

Excuse me professor I'm gonna try
Still you don't let me breath
'Cause it's been a long time you know
'Cause it's been quite a time until it's now
And still you don't let me to breath

Nail me and bleed me just to get something in me
They are talking about the nation, talking about the crime
All you need surroundsyou dear
We're talking about the people, talking about the fools
If we're talking about our minds, we're talking about the rules
All you want and all you need is to be someones brother
