

## Backstreet Love Affair

Survivor

Girl, is there something in the night  
That draws us together  
Are these moments worth the fight?  
Why must we keep it to ourselves  
The secret we hold inside  
Let me take you in my arms  
With the strength of a love that's denied  
And we've always believed in our heart  
That the chances we've missed  
Still exist in the world after dark

Backstreet love affair  
Running through the heart of the night  
Backstreet love affair  
Meet me in the city tonight

There's a tension I can taste  
That speaks for the danger  
Let the warnings go to waste  
Eyes that reflect a secret fire  
That covers the fear inside  
In a flash we're lost from sight  
To explore the romance that we hide  
And the thrill of the chase plays a part  
In the chances we take  
We escape to the world after dark

Backstreet love affair  
Running through the heart of the night  
Backstreet love affair  
Meet me in the city tonight
