Til I Found You

Susan Tedeschi

When I close my eyes All I see is your face You've got me going so crazy Just to feel your warm embrace We all need somebody And I never knew I needed somebody Til I found you

You make me feel so alive A felling sent from above Like time out of mind When I feel your sweet love We all need somebody And I never knew I needed somebody Til I found You

A bus ain't no home But there's a gypsy in me Always searching for someone Or something to set me free
