

Kamikaze

Susanne Sundfør

Did you ever feel you're heartbroken?
Did you ever feel like it's the end of the world?
The bells are ringing, but the blood's stop pumping
As I feel the weight of the fall

They say help is near, but no one here can feel our fear
It's a minefield, us, it'll never disappear

Cause you take me back, you take me back
And you kamikaze
And tonight's the night we might fall together

And you take me back, you take me back
And you kamikaze
And tonight's the night we might fall together

Did you ever feel your heart stopping?
Did ever feel like a moth drawn to a flame?
It's time to put on your life-jacket
Cause I'm about to step up the game, oh

They say help is near, but no one here can feel our fear
It's a minefield, us, it'll never disappear

Cause you take me back, you take me back
And you kamikaze
And tonight's the night we might fall together

(Higher, and higher)
Tonight's the night we might fall together
(Higher, and higher)
Tonight's the night we might fall together
(Higher, and higher)
Tonight's the night we might fall together
(Higher, and higher)
Tonight's the night we might fall together
