## Kamikaze

## Susanne Sundfør

Did you ever feel you're heartbroken? Did you ever feel like it's the end of the world? The bells are ringing, but the blood's stop pumping As I feel the weight of the fall

They say help is near, but no one here can feel our fear It's a minefield, us, it'll never disappear

Cause you take me back, you take me back And you kamikaze And tonight's the night we might fall together

And you take me back, you take me back And you kamikaze And tonight's the night we might fall together

Did you ever feel your heart stopping? Did ever feel like a moth drawn to a flame? It's time to put on your life-jacket Cause I'm about to step up the game, oh

They say help is near, but no one here can feel our fear It's a minefield, us, it'll never disappear

Cause you take me back, you take me back And you kamikaze And tonight's the night we might fall together

(Higher, and higher) Tonight's the night we might fall together (Higher, and higher) Tonight's the night we might fall together (Higher, and higher) Tonight's the night we might fall together (Higher, and higher) Tonight's the night we might fall together
